Applications and Use

The product is designed for industrial applications where the label has to survive harsh environments.

Conversion and Printing

The facestock is printable with water-based inkjet pigment inks, flexographic inks, writable with pen, pencil, surgical marker, and Sharpie markers, and can incorporate color-on-demand in compliance with GHS standards when printed with pigment-based inks. It exhibits good light and water fastness. When printed on press models using dye-based or flexographic UV inks, may not show print quality and ink anchorage on par with pigment WBIJ inks.

This liner is suitable for roll-to-roll conversion and not recommended for sheeting.

Compliance and Approvals

When printed with one of the following printers the material complies with BS 5609, Section three: Epson C-831, C-3400 and C-3500.

The adhesive meets the requirements of FDA 21 CFR 175.105 for indirect food contact.
