Applications and Use

This product is designed for the use in short term high temperature (< 220°C) environments, for example in the metal processing industry. Application tests are recommended.

The high coat weight adhesive providing high tack and peel makes this product suitable for labelling rough and even slightly contaminated substrates.

Conversion and Printing

This product can be printed using thermal transfer printers. Best results can be achieved with resin or wax/resin ribbons, for example Armor AXR7+, DNP R300, Iimak SP330 or Ricoh B110A. Conventional printing, such as letterpress, flexo or screen is possible, as well as digital UV inkjet printing. It is recommended to evaluate the temperature resistance of inks prior use.

Shelf Life

To obtain optimal performance, use this product within one year of the date of manufacture, under storage conditions as defined by FINAT (20-25°C; 40-50%RH). Prolonged storage outside these conditions might reduce the shelf life.
