Adhesive Performance

The adhesive features excellent tack and adhesion on a wide variety of substrates, including apolar, and slightly rough substrates.

Applications and Use

The product is used in a variety of labelling applications, when the advantages of digital printing: short runs, last minute changes, personalised layouts and fast turn-round full colour printing are required. The product is designed for Wine labelling, but is also suitable for primary labelling of high and premium goods eg: spirits, specialist foods. For more water/moisture resistance, it is strongly recommended to use water-based Inkjet technology with pigment-based inks. Due to the nature of the ink, dyebased inks tend to dissolve in water.

Conversion and Printing

Compatible with OEM labelling equipment, such as Epson, Primera, Memjet and other water-based inkjet systems. Optimised for dye and pigment inks. The material can be converted by roll-to-roll conversion technologies.

Compliance and Approvals

The adhesive S2047N is suitable for contact with dry and moist, non-fatty foodstuffs. For complete information regarding the food contact compliance status, please contact your local sales representative for a Food Contact Statement.
